(二)

Do you know leopard cats? They are about the size of household cats and have beautiful fur like leopards. Different from household cats, there are two wide white lines along with dark lines running from their foreheads to their eyes and two white lines from their eyes to their noses. They can't meow, either. Leopard cats are great climbers and good at catching small animals. They eat birds, frogs, rats and so on. Maybe leopard cats look like household cats, but remember they are endangered.

Leopard cats were everywhere in Taiwan before, but now we see a few of them in the mountains only in Miaoli, Nantou and Taichung. The study shows their numbers are about 300 to 500. More and more people come to their **habitats**, but it's difficult for people and leopard cats to live together. Leopard cats may eat chickens and destroy farms, so farmers don't welcome them. Businessmen want to build more houses and shops. Also, many leopard cats are killed by cars. If we don't hurry to fix the problems, we may not see them anymore in years. Leopard cats need our help. Let's act before it's too late.
